

THE STONHARD DIFFERENCE FOR
ARCHITECTS AND DESIGNERS

STONHARD®

MANUFACTURER AND INSTALLER OF SEAMLESS FLOORS, WALLS AND LININGS

A BRIEF HISTORY

In 1922, a small company had an idea: a patch-and-repair business to help plant managers fix floors and keep factories running. Through this, the foundation for Stonhard was established. When facility managers began to recognize the value of preventative maintenance, Stonhard said, "We'll do it for you." This turnkey model of taking responsibility for both products and installation became "The Stonhard Difference". As the Stonhard brand evolved over the past century, so did our definition of The Stonhard Difference.

Today, "**The Stonhard Difference**" isn't only what sets us apart. It's who we are and what we believe. It means we strive to make a difference in your life, and we do it best through our dedicated team, unique products, and exceptional services locally in Canada as well as all around the globe. It means you get to have a single point of contact throughout the entire project and a single-source warranty. It means we get to do what we're best at so you as an architect, can make a positive difference in designing the perfect space for your client.

WHAT DOES THE STONHARD DIFFERENCE MEAN FOR ARCHITECTS AND DESIGNERS?

QUALITY PARTNERSHIP - FROM START TO FINISH

Starting with the discovery phase, our technical experts will first evaluate your needs and recommend customized solutions based on your facility. With a single point of contact, our Architectural and Engineering Design Reps in conjunction with the local Territory Managers will guide you and ensure that your vision is being met with precision. Our highly trained crews and technical team will then use careful installation techniques and best practices so that all necessary precautions are taken, and the system is applied seamlessly according to your specifications. The project will end with a post-site inspection and Stonhard will top it off by offering a single-source warranty for all products. In sum, from concept to completion, we're with you at every stage!

SUSTAINABILITY IS OUR DUTY, NOT A WISH

Earth is the one thing we all have in common and the greatest threat to our planet is the belief that someone else will save it. At Stonhard, we utilize sustainable and rapidly renewable materials to ensure we're doing our part in maintaining a healthy environment. Flooring Solutions like Stonclad GR are produced with 25% recycled glass fillers whereas Stonclad G2 and Stonblend GSI-G utilize recycled glass and plant-based resins. In addition, we also have a comprehensive range of LEED-certified eco-friendly solutions.
